

Community-based green infrastructure

a free, public **webinar** with Watershed Management Group

Across North America, **neighborhoods, schools, community groups, and grassroots organizations** are using green infrastructure methods to make their communities more livable and sustainable, including:

- rain gardens
- bioretention basins
- vegetated swales
- street trees
- rainwater harvesting

Community-driven approaches to green infrastructure provide unique benefits to communities including **education, public buy-in, community development, and vital energy.**

In this interactive webinar, we'll explore the benefits and challenges of community-driven approaches to green infrastructure through **case studies from three North American communities.**

Made possible by a grant from:

April 27, 2011

4:00-5:30 pm (Pacific)

Speakers include:

- Bryant Smith
Parks & People Foundation
Baltimore, Maryland, USA
- Marty Dolan
Tupper Neighbourhood Greenway
Vancouver, BC, Canada
- James MacAdam
Watershed Management Group
Tucson, Arizona, USA

Time will be available for questions from the audience.

This webinar is free and open to anyone. **To register, go to:**
